## Summary

Front-end Developer with more than 1.5 years of experience in designing and implementing dynamic and responsive web applications. Proficient in React, JavaScript, HTML, and CSS, with a solid understanding of modern front-end frameworks and libraries. Holds a Bachelor's degree in Computer Science. Adept at collaborating with cross-functional teams to deliver high-quality user experiences and continuously seeking to learn and apply new technologies.

## Education

**KVG College of Engineering** — 2022
*Bachelor of Engineering in Computer Science (GPA: 7.67 / 10.00)* — *Sullia, Karnataka*
- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Concepts (OOP), Web Technology and Applications, Database Management Systems, Operating Systems, Software Engineering

## Experience

**BB Leads** — Aug 2022 - May 2024
*Front-end Developer* — *Mangalore, India*
- Utilized HTML, CSS, JavaScript, React expertise to create visually stunning and user-friendly Web applications.
- Formulated visually striking UI for multi-page and one-page websites.
- Demonstrated growth by enhancing proficiency in Bootstrap, resulting in a 20% improvement in the efficiency of creating effective online applications.

## Technical Skills

**Languages**: JavaScript, Java, C
**Technologies**: ReactJS, Express.js, Node.js
**Database**: MongoDB, SQL
**Concepts**: Object-Oriented Programming (OOP), Data Structures and Algorithms, Complexity Analysis, Operating System, Computer Networks, RESTful APIs, JSON, Version control (Git/GitHub).

## Certifications and Training

**Java and Python Full Stack Development** — Aug 2022 - Feb 2023
*Completed at KodNest Technologies* — *Bangalore, Karnataka*

## Projects

**Food Ordering Platform** | Link
- Developed and deployed a food ordering application using React.js for the frontend and Node.js for the backend.
- Deployed the application online to ensure seamless accessibility and enhance user experience.
- Integrated MongoDB for efficient data management and Stripe for secure payment processing.

**Tech Blog** | Link
- Developed the frontend using React.js and Tailwind CSS for a seamless user interface. Implemented an admin dashboard for creating and posting blogs and managing users.
- Implemented a backend with Express.js and Node.js to manage data and handle user requests effectively.
- Integrated OAuth for secure user authentication and utilized JWT for authorization.

**DIGITAL CLOCK** | Link
- It's displays live browser's time using Date object in JavaScript and setInterval method of Window object.
- The set time is displayed and message and image gets updated according to live time matching the set time.

**Labour Hiring** | Link
- Developed the frontend with Angular for a seamless user interface.
- Implemented the backend using Java, Spring Boot, and utilized Hibernate for database operations.
- Implemented database functionality using MySQL for efficient data storage and retrieval in the application.
